

## GSS8000 CPU Card BIOS battery

RS Pro CR2032 3V Lithium Manganese Dioxide Coin Button Battery

RS Stock No.597-201BrandRS Pro RS Pro

RS Pro CR2032 3V Lithium Manganese Dioxide Coin Button Battery

### Product Details

Lithium Coin Button Battery, CR Series

CR type lithium button batteries offer long shelf life and are ideal for items such as watches, memory support and cameras. All RS coin cells are mercury free.

### Key Features

Non-rechargeable lithium coin cells

CR type suitable for intermittent high load applications

Long shelf life

Commonly used in applications like watches, calculators and cameras

Coin & Button Cells, Lithium

All cells in this range have a voltage of 3V.

Technical specification for all types

Size CR2032

Nominal Voltage 3V

Diameter 20mm

Dimensions 20 x 3.2mm

Terminal Type Standard

Chemistry Lithium Manganese Dioxide

Capacity 210mAh

Operating Temperature Range -10 → +60°C
